## Apprenticeship of the day.

### Environmental Practitioner – Waterman Group London

We are looking to recruit Apprentices to join our London Infrastructure & Environment team in September 2020.

#### Apprenticeship summary

- **Weekly wage** - £ Competitive Salary 16,000.00 – 22,000.00
- **Working week** - Monday to Friday, TBC.
- **Apprenticeship level** – Degree – Level 6

#### Vacancy Description

Apprenticeships are a fantastic opportunity to earn while you learn and are ideal for students who would like to balance study at university on a day release basis with hands-on work within the business. We are looking to recruit our environmental leaders and subject matter experts of the future and offer the opportunity to gain broad experience within a leading engineering and environmental consultancy with international reach.

As part of our Apprentice Programme, you will develop your skills and knowledge whilst working on a wide range of high-profile projects for a diverse client base, gaining valuable work experience and formal qualifications at the same time as earning a competitive salary. You will have the opportunity to experience various disciplines within Waterman's environmental business.

Environmental Practitioners will combine a high level of knowledge and understanding of environmental principles and techniques to complex environmental systems. Their expertise will be developed, adaptable or transferable to a range of environmental specialisms, for example, environmental policy and legislation, air quality, climate change, energy, water resources, waste management, ecology, acoustics, land contamination, sustainability, landscape or heritage.

In their daily work, an employee in this occupation interacts with junior and senior members of their own project team, typically in an office-based environment but also on site. They will work with technical specialists both within and beyond their profession, for example, environmental managers and consultants, environmental impact assessors, design and commissioning engineers and architects.

---

## Personal qualities

This hands-on experience is complemented by one day per week at University where you will be studying for a BSc in Environmental Science. Many of our Apprentices go on to achieve Chartered status. In order to meet the challenges within the work and degree programme, we are looking for candidates with the following academic achievements:

- 5 GCSEs grades A-C / 9-5 including Maths & English.
  - 2 A-Levels at grades A-C from the following subject options: Science, Maths, Geography, Psychology OR a BTEC Level 3 to include 6 units in a science subject.
- 

## About the employer

*Waterman Group is a multidisciplinary consultancy providing sustainable solutions to meet the planning, engineering design and project delivery needs of the property, infrastructure, environment and energy markets.*

Founded in 1952, the company has since grown into a leading engineering and environmental consultancy with offices throughout the UK, Australia and Europe. Waterman works with government agencies, local authorities, government-regulated industries and private sector clients to provide innovative, sustainable and economic solutions across a wide spectrum of business activities.

The firm has extensive experience in property and buildings, environmental consultancy, power and energy, roads, highways and rail infrastructure, urban and regional planning. Award winning teams provide professional consultancy services throughout the complete life cycle of the asset starting from initial surveys and concept planning, through to design, delivery, project management, supervision and on-going maintenance.

Waterman Group is part of [CTI Engineering](#), the leading Japanese engineering consultancy. CTI provides professional consulting services related to civil engineering and construction works, including planning, research, design, and project management.
