## SECONDARY EDUCATION

## FURTHER EDUCATION

## HIGHER EDUCATION

## WHAT DO THEY MEAN?

### A Levels

A two-year course post 16, subject-based qualifications that can lead to university, further study, training, or work.

### T Levels

A two-year technical course which is equivalent to 3 A-Levels

### Vocational, Technical, Applied

Qualifications with an emphasis on developing practical skills for employment which may allow access to Higher Education if taken at Level 3.

### Apprenticeships

Apprenticeships offer training for a job while working with an employer, alongside study for an associated qualification. You get paid while working. They are available in a variety of levels: **Intermediate (Level 2), Advanced (Level 3), Higher (Level 4 & 5), Degree (Level 6)**

# AGRICULTURE, ENVIRONMENTAL & ANIMAL CARE

The agricultural, land-based and environmental industries play a key role in both the national and global economies. In the UK alone, the sector is worth more than £8.9 billion per year, and employs more than a million people and 500,000 volunteers

97% of agricultural businesses employ fewer than 10 people

60% of the food we eat in the UK is produced in the UK

1.1 million people and 500,000 volunteers work in land-based and environmental industries

# CARE SERVICES

The care system is set to change a lot over the coming years as the UK population ages. But the very young need looking after too as more parents go out to work, there's a growing demand for trained childcare providers.

Health and care is something we often take for granted, but couldn't cope without. People who work in health and care go home at the end of the week with more than just a paycheque. They know their work helps other people and makes our society a better place.

It takes more than doctors to keep our health service running including a range of careers in health care such as dispensing medicines in a pharmacy, giving eye tests, working as a dental nurse and many more.

# CONSTRUCTION

If you're the sort who enjoys physical work, you could help lay the foundations of a 20 storey building; build scaffolding around a famous landmark due for restoration; plaster the interior of an office building; or maintain a heavy plant. Those with a flair for organisation could help make sure projects run on time and within budget; liaise with suppliers; or assist a civil engineer with design plans there are many places to put your creative skills to the test.

More than two million people are employed in the construction industry.

It is estimated that over 220,000 construction jobs will be created in the next five years.

Areas of construction growth include energy-related programmes, housing and infrastructure.

Completing an Apprenticeship is one of the most popular ways to get into a construction career.

# DIGITAL

The Digital sector involves working with computers and information systems, including computer applications, software and hardware. There are jobs in design, development, manufacture, customer service, sales and installation.

Every brand you can think of, along with public sector organisations, football teams and charities recruits for staff in the digital sector. If a company has any kind of website, mobile app or digital presence, they'll need some kind of digital workforce to power it.

The digital economy is a major source of employment. The research suggests that some 1.46m people work in digital companies, with around 45,000 jobs being advertised at any one time.

# EDUCATION & CHILDCARE

You'll be using your communication skills and knowledge to help people develop and learn in many of these jobs. Whether you like working with children or training people in sports, this is a sector where you can use your knowledge and skills to help others

Jobs in education are about helping people to develop and learn. There are opportunities in nursery, early years, primary and secondary schools, or in further or higher education or online teaching.

There are also support roles like mentor, teaching assistant, school business manager, business development, administration and maintenance

Teachers will need to be able to use new technology to enhance teaching.

# ENGINEERING & MANUFACTURING

The engineering and manufacturing sector is all about making things work. It's a huge field, so you'll specialise in a particular area, but there are many different options available. You need to be good at following instructions and working as part of a team, but engineers in particular often need to use their own initiative to solve problems.

The UK is a world leader in engineering construction, second only to the USA.

There are more than 138,000 employees working in the science, engineering, manufacturing and technology industries in the UK.

The building services engineering sector carries out £20 billion of work each year and at any one time is training 18,000 apprentices.

# HAIR & BEAUTY

Consider a career in hair and beauty if you enjoy making others feel better about themselves, as well doing something creative. Jobs can be undertaken in a variety of settings, and it's common for professionals to run their own businesses

Hair, beauty and nails therapy are diverse professions that can take you virtually anywhere and you could find yourself working in some unusual locations besides a high street salon.

Many hairdressers and beauty therapists operate as self-employed freelancers, running their own businesses and visiting clients in their own homes

Many people go on to work in sales, marketing, public relations and photography, while others choose to concentrate on the business aspects of running a salon rather than performing treatments.

# HEALTH & SCIENCE

Health and science is something we often take for granted, but couldn't cope without. People who work in healthcare go home at the end of the week with more than just a paycheck. They know their work helps other people and makes our society be a better place.

Healthcare scientists help prevent, diagnose and treat illness using their knowledge of science and their technical skills. They use their expertise to help save lives and improve patient care in a supporting role or in direct contact with patients

Working in the healthcare industry comes with a set of physical demands. While office jobs might require you to sit all day, you can expect to be on your feet for hours on end if you're dealing with patients.

If you want to help make the world a healthier place, working in healthcare might be right for you.

# HOSPITALITY & CATERING

Where work finishes for most of us, it's only just beginning for people employed in hospitality and catering. They're the ones who run the restaurants, serve us in pubs and bars and make us feel welcome in many of the establishments across the UK.

The hospitality and catering sector employs 7% of the working population in the UK

The sector is mainly made up of small businesses - 46% employ fewer than five people

Nationally, a third of the current food and drink manufacturing workforce will be retiring in the next 20 years with 125,000 new recruits needed by 2028

# LEGAL, FINANCE & ACCOUNTING

Most careers within this sector require employees or associates to hold professional qualifications such as auditors, accountants, investment managers, management consultants, public relations professionals and lawyers.

It is likely that many routine tasks done by accountants, auditors and legal associates will become automated resulting in fewer more highly qualified staff dealing with more complex tasks

There is a growing need in financial services for people who have both IT and financial services skills.

# PROTECTIVE SERVICES

Consider a career in public services if you enjoy helping people, physical activity and aren't afraid of accountability. Jobs can be highly demanding, but the rewards are many.

Public services are critical and include education, fire services, police and many more besides. People who work in public services go home at the end of the week with more than just a pay cheque. They know their work helps other people and makes our society a better place.

# TRANSPORT & LOGISTICS

This sector is about moving, handling and storing goods, and passenger transport. It includes air freight, shipping, wholesaling, road haulage, freight forwarding, postal services and couriers.

Efficient distribution and storage is vital to many manufacturers across the UK, wholesalers and retailers, and efficient transport is important to commuters, shoppers and other travellers.

In the future low and medium skilled warehouse jobs will be at risk from automation, but more LGV and forklift drivers, customer services, supply chain and warehouse managers will be needed.

# SALES, MARKETING & PROCUREMENT

Behind the world of retail and shopping is a huge industry of people who get the word out, help people understand the goodness of a product of service, and choose what's in the shops.

People in sales are needed to link customers with an employer's products or services, and show them why they're great.

It's about being able to excite people with your point of view and really understanding a product or service, so that people want to buy it or get involved.
