### What is an apprenticeship?

An apprenticeship is a real job where you learn, gain experience and a qualification and get paid.

You're an employee with a contract of employment and holiday leave. By the end of an apprenticeship, you will have the right skills and knowledge needed for your chosen career.

There are four levels of apprenticeship, intermediate, advanced, higher and degree. It can take between one and six years to complete an apprenticeship depending on which one you choose, what level it is and your previous experience. It's funded from contributions made by the government and your employer.

Apprenticeships are an alternative option after your GCSEs / BTECs at the end of Year 11. To become an apprentice, you must:

- be 16 or over
- not already be in full time education
- spend at least 50% of your working hours in England

If you don't live in England, check out apprenticeship options in [Scotland\(Opens in a new window\)](#), [Wales\(Opens in a new window\)](#), or [Northern Ireland\(Opens in a new window\)](#).
