

Year 12 into 13 bridging work 2021

AQA Design and Technology year 12 into 13

Bridging information and requirements over the Summer.

You will be working on exam preparation and the NEA section A & B over the Summer break to be in a good starting point in September.

A big well done for the work and the effort you have put in this year.

Make sure your theory folder is in order with all your work for D&T in it.

Task 1

This is a substantial piece of work that will take some time to complete. Complete the NEA section A and B. Use the text book to help with this and make sure you are using the Specification to help you get the most marks. When you complete this – On a PowerPoint presentation, set at A3 please. Look at the examples on SharePoint to get an idea of what level of detail will be needed. Use the help sheets you have received in class to help you with this work. You can email me during the holidays. I will not be on email everyday but will be popping in and out of it so can support you over the break.

Task 2

Download Google Sketch up at home. Go through the student tutorials to familiarise yourself of the functions of the program. You will need this skill to be able to draw design iterations on this for your final project in year 13. Use the booklet handed out in lesson to help you with this. You will create a 3D drawing of a pirate ship playhouse.
